

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter present the conclusion and suggestion based on finding and discussion of the data analysis.

5.1 Conclusion

This study provides responses for the benefits listening with the use of Busuu application for students. Busuu application gives listening practice, has engaging and interesting elements. Also, the student stated that the mobile application is really useful and makes it easier to understand the information. This study also illustrates that learning a language using mobile learning, particularly Busuu, provides learning opportunities and fast feedback. As a result, Busuu is recommended for use in improving students' listening abilities because it gives a wide range of listening exercise options that may be adapt to the students' levels. The Mann-Whitney U Test post-test obtained a value of $0.000 < 0,05$ which Asymp. Sig is accepted. The assistance of teachers for technology use in the educational setting will be great application and have many benefits for students' learning.

After the researcher concludes the data from the result of the practice, finally the researcher conducted from the main problem of this researcher, this significant effect or not of using Busuu application to improve students listening skills of the first grade at SMA N 9 Banda Aceh followed:

1. From the result the researcher is proven the student score of listening by using Busuu application can improve. This result this answered the problem that use of Busuu application to improve students listening skills of the first grade at SMA N 9 Banda Aceh is effective.
2. After conducting Busuu application, the student at SMA N 9 Banda Aceh was increase in listening and understanding, it can be seen from result of pre – test and post – test the students.
3. The use of Busuu application can make the student use the social media for academic purpose and increase listening skills.
4. The use of Busuu application for student have more motivated for student because in Busuu application easier to learn.
5. The use of Busuu application gives the positive contribution and better to learn for the students in listening skills.

5.2 Suggestions

Based on the result analysis and conclusion above, the researcher given the suggestion that might be usefully, that followed:

1. For the teacher

- a. The teacher can use Busuu application for to teach the student in learning listening skills.
- b. Using Busuu application in learning can be easier to learning process can make the student more interesting with a learning system from Busuu application that can be done anywhere and easier to understand in learning listening skills.

2. For the students

- a. Students can use the Busuu application to improve their listening skill with they use Busuu application

- b. Student can be more active and easier in the listening learning process by using Busuu application

3. For the next researcher

- a. Future researcher is expected use of Busuu application in other generation researcher.
- b. Future researcher needs to evaluate test was related with the situation and variable that need to be measured from Busuu Application.
